DETAILED ACTION

Election/Restrictions

Claims 15-18 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 7-18-05.

Claim Objections

Claims 6-14 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only--, and/or, --cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 6-14 not been further treated on the merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by English Translation of WO 02/41826.

WO 02/41826 teaches transferring inorganic colloids, in particular nanoparticles, from an organic starting solution into a solution, where the target solution is either an inorganic, in particular aqueous solution. The reference further teaches that 4-dimethylaminopyridine (DMAP) and mecrocaptoundecanoic acid may be present in the

process. Gold is a particular nanoparticle which the reference places a DMAP shell. The reference also discloses that the particle size is the in range of that taught by Applicant. See page 4, lines 4-22, page 5 line 22-page 6 line 3, page 6 line 25-page 7 line 17, page 11 lines 5-14, page 14 line 9+ and page 21 line 4+. The composition as taught by WO 02/41826 appears to anticipate the claimed invention.

Conclusion

The remaining references listed on forms 892 and 1449 have been reviewed by the Examiner and are considered to be cumulative to or less material than the prior art references relied upon in the above rejections.

References EP 1 072 653, PL 177180, Spontaner Phasentransfer Metallischer Nanopartikel von der Organischen in die wässrige Phase and Goldtausch Aus Dem Tintenstrahldrucker are only consider to extent in which they appear in the specification..
